PROFILE SUMMARY

Experienced Laravel developer with expertise in building scalable web applications and RESTful APIs. Proficient in designing and delivering robust, user-friendly solutions with a keen eye for detail and a passion for clean, efficient code. Skilled in optimizing application performance, ensuring security best practices, and collaborating effectively with front-end teams to enhance overall user experience.

WORK EXPERIENCE

Rlogical Techsoft Pvt. Ltd, *Laravel Developer* Nov 2024 – Present

- Architected and delivered key functionalities for a robust food ordering platform using Laravel, encompassing order management, user authentication, and secure payment processing.
- Enhanced database query performance and overall system scalability to handle high user traffic seamlessly.
- Partnered closely with front-end developers to integrate a responsive and user-friendly interface, significantly improving the user experience.

Acespritech Solution Pvt. Ltd, *Laravel Developer* Apr 2024 – Oct 2024

- Developed and implemented key features for a comprehensive food ordering system using Laravel, including order management, user authentication, and payment processing.
- Optimized database performance and query efficiency, ensuring smooth and scalable operation during high traffic periods.
- Collaborated with front-end developers to integrate a responsive and intuitive user interface, enhancing the overall user experience.

Peanutsquare LLP, *Laravel Developer* Feb 2022 – Apr 2024

- Worked on diverse projects across various domains, applying Laravel to deliver tailored solutions that meet client needs and project requirements.
- Designed and developed custom web applications, incorporating features such as user authentication, data management, and API integration.
- Collaborated with cross-functional teams to ensure project milestones were met, providing technical support and insights to enhance project outcomes.

Crest Infotech, *Laravel Developer* May 2021 – Jan 2022

- Worked on diverse projects across various domains, applying Laravel to deliver tailored solutions that meet client needs and project requirements.
- Designed and developed custom web applications, incorporating features such as user authentication, data management, and API integration.
- Collaborated with cross-functional teams to ensure project milestones were met, providing technical support and insights to enhance project outcomes.

PROJECT EXPERIENCE

Food Ordering System, *Laravel Developer*

- Developed comprehensive admin and restaurant owner panels: Created intuitive dashboards and management tools for both administrators and restaurant owners to handle orders, manage menus, track deliveries, and analyze sales data.
- Built user-facing application and restaurant APIs: Designed and implemented RESTful APIs for seamless interaction between the user application and restaurant systems, supporting

functionalities like order placement, menu browsing, and real-time status updates.

- Integrated payment gateways and optimized performance: Implemented secure payment processing and optimized the application's performance for high traffic, ensuring a smooth user experience and efficient handling of transactions.

Good Nature Tea Website, *Laravel Developer*

- Developed an informational website: Created a user-friendly website for showcasing tea products, company information, and related content, providing an engaging and informative experience for visitors.
- Implemented an admin panel: Designed and built an admin panel using Laravel to enable easy management of website content, including text, images, and product details, allowing for efficient updates and content control.
- Optimized website performance and security: Ensured the website was responsive and fast-loading, while implementing security measures to protect user data and ensure smooth operation.

Kidsvits Multivitamin Website, *Laravel Developer*

- Developed an informational website: Created a platform to showcase multivitamin products for babies, providing detailed information about the products and their benefits.
- Built a content management system: Designed and implemented an admin panel using Laravel to manage website content, including product descriptions, images, and other relevant information.
- Ensured optimal performance and user experience: Focused on website performance and user experience to ensure fast loading times and a responsive design across various devices.

CRM for Multiple Rehab Centers, *Laravel Developer*

- Developed a custom CRM system: Built a comprehensive CRM to manage patient records, scheduling, and communications across multiple rehab centers, streamlining administrative processes and enhancing patient care.
- Implemented role-based access control: Designed and integrated a secure authentication and authorization system, ensuring that sensitive patient data is accessible only to authorized personnel.
- Enhanced reporting and analytics: Developed features for generating detailed reports and analytics, providing insights into patient progress, center performance, and operational efficiency.

Educational Web Platform, *Laravel Developer*

- Developed and maintained a robust education web platform using Laravel, ensuring seamless content management and user engagement.
- Integrated role-based access control and secure authentication to protect sensitive educational content and user data.
- Enhanced platform performance and responsiveness to deliver an optimal user experience across devices.

Music Project Management Platform, *Laravel and Vue JS Developer*

- Contributed to the development of a platform designed for musicians to manage projects seamlessly, enabling easy collaboration and connecting with skilled professionals.
- Implemented core features for project tracking, communication, and resource management to improve overall workflow efficiency.

Car Listing and Auction Platform, *Laravel Developer*

- Built and maintained a car listing and auction system with a comprehensive admin panel for managing listings, users, and auctions.
- Developed advanced filtering and search capabilities to improve user experience and engagement.

E-Commerce and Admin panel, *Laravel Developer*

- Developed an admin panel and e-commerce platform supporting multiple payment options, including USPS money orders and Bitcoin.
- Integrated secure payment gateways and optimized transaction handling for high efficiency and reliability.

Marine Product Survey API and Admin panel , *Laravel Developer*

- Designed and implemented APIs and an admin panel to manage marine product survey forms efficiently.
- Ensured secure data handling and streamlined administrative workflows to support accurate survey data collection and management.

EDUCATION

Bhavnagar University

BCA, Bachelor of Computer Application

Cumulative Percentage: 65%

May 2016

GSHSEB, Palitana

HSC(12th), Higher Secondary Education
